

RASMUS KAMPMANN

BI Developer & Data Analyst

Odense, Denmark · [LinkedIn](#) · [Portfolio](#) · [GitHub](#)

PROFILE

BI developer and data analyst with 3+ years of commercial experience across sales, operations, and finance. I build the reporting and BI the business runs on: ERP, CRM, and spreadsheet data unified into one source of truth with data models and automated pipelines in Power BI and SQL. I treat reporting as one connected process from source data to decision, not as one-off reports. Most of my experience comes from small companies and my own, where you see the whole business, sit close to the decisions, and own the work end to end. I'm used to working in international environments, in Danish, English, and Spanish. AI is part of how I work: built into the data layer, where it removes manual work. Open to Data Analyst and BI Developer roles in Denmark.

CORE COMPETENCIES

Reporting & BI: Power BI, DAX, semantic modeling, dashboard ownership, Excel (advanced)

Data & systems: SQL, PostgreSQL, Power Query, data modeling, connecting source systems and API sources

Commercial analysis: Forecasting, budgeting input, channel and customer profitability, KPI definition, variance follow-up

AI & automation: Claude Code, LLM workflows, n8n, Python, automation of manual reporting

Cross-functional: Stakeholder dialogue, requirements translation, presenting to leadership, documentation

PROFESSIONAL EXPERIENCE

Data Analyst & BI Specialist

Jun 2026 – Present

Veginova Seeds · Odense, Denmark · Hybrid

Back at Veginova over the agricultural high season, responsible for BI, reporting, and controlling across sales, operations, and production. Building on the reporting and data layer I owned as data analyst, now extended into forecasting and financial follow-up.

- **Production planning system.** Tells the business what to produce, how much, and when. Validated against the planner's own numbers and published as a case study.
- **Invoice and profitability dashboard.** Profit per product and per customer, plus cash owed, reconciled to the accounts. Published as a case study.

Stack: SQL · Power BI · DAX · Python · Excel · Supabase · Claude Code

Data Analyst & Commercial Analytics

Feb 2026 – May 2026

Digi-Tal Regnskab · Denmark · Hybrid

Built the commercial data infrastructure and analytics layer for a Danish accounting and fintech firm. Unified CRM, ad, and registry data into one source of truth and built the models and analysis that drove commercial decisions.

- **Commission and forecasting model.** Rebuilt the commission structure to weight MRR and LTV, removing the incentive to discount monthly subscriptions to close.
- **Full-channel revenue analysis.** Broke down close rate, conversion, and pipeline velocity across paid, outbound, and inbound, surfacing which channels drove customers and which burned budget.
- **Predictive models.** ICP and lead-scoring model with strong holdout performance, plus an ML model predicting a prospect's accounting software from public registry data alone, at ~75% accuracy across the Danish SMB market.
- **Churn and segmentation analysis.** Segmented the customer and prospect base into active, lead, lost, and inactive cohorts, surfacing funnel drop-offs and the patterns behind closed deals.

Stack: SQL · Python · Power BI · Excel · Pipedrive · Clay · Claude Code

Data Analyst

May 2025 – Feb 2026

Veginova Seeds · Odense, Denmark · Hybrid

Promoted into BI ownership at an agricultural seed business. Owned reporting and data infrastructure across sales, operations, and production, and the analysis leadership ran on.

- **Owned the single source of truth.** Power BI dashboards, SQL data models, and automated reporting pipelines across sales, operations, and production.
- **Improved KPI accuracy by 40%+.** Standardized metric definitions across teams and reconciled source data so dashboards matched the underlying systems.

- **Cut reporting time by 10+ hours per week.** Stabilized broken workflows, consolidated data sources, and built repeatable pipelines instead of weekly manual rebuilds.

Stack: SQL · Power BI · DAX · Python · Excel · Supabase · Claude Code

Marketing & RevOps

Aug 2023 – May 2025

Veginova Seeds · Odense, Denmark · Hybrid

Started in marketing and lead sourcing, moved into RevOps. Built the operational data layer connecting sales, marketing, and production, and the reporting that grew into the data analyst role.

- Connected ERP, CRM, and operational tools into reliable cross-functional data flows for sales and operations teams.
- Built reporting workflows surfacing the metrics leadership used for weekly decisions.
- Built automated data collection and enrichment pipelines, replacing manual spreadsheet work.

Stack: SQL · Power BI · Clay · n8n · Supabase · Apify · Excel · Claude Code

Data and Automation Systems (independent)

Jun 2024 – Aug 2025

Sira Logic · Remote

Designed and shipped end-to-end data pipelines for B2B companies: from data collection to operationalized scoring inside client CRMs.

- Built enrichment and scoring workflows into a single pipeline, improving qualification accuracy by 30–40%.
- Built custom web scraping systems for industry-specific sources and owned the full run from scoping to handoff.

Stack: SQL · Python · n8n · Clay · Apify · HubSpot · GoHighLevel · Excel

Marketing & Digital Graduate

Jan 2023 – Aug 2023

Damstahl Danmark · Region Midtjylland, Denmark · Part-time

Part-time student role alongside the BBA. Managed product and marketing data in ERP and CRM across European markets. Built Excel dashboards for campaign reporting and standardized regional data processes.

EDUCATION

Bachelor of Business Administration (BBA)

Aug 2020 – Jun 2023

Aarhus BSS, Aarhus University · Aarhus, Denmark

Exchange semester: Universidad del Pacífico · Lima, Peru (Aug 2022 – Dec 2022)
