

RASMUS KAMPMANN

Business Controller • Data Analyst • BI Developer

Odense, Denmark • [LinkedIn](#) • [Portfolio](#) • [GitHub](#)

SUMMARY

Data analyst and BI developer with commercial experience across sales, operations, and finance. I work across the reporting, forecasting, and controlling that sit behind business decisions: sales pipeline and channel revenue, profitability and churn, forecasting and KPI definitions, built in Power BI, SQL, and Python. My strength is reading the numbers from inside the business, so reporting matches how sales, operations, and finance actually use it. I use AI as part of how I work, with Claude Code and LLM workflows to speed up data prep, documentation, and analysis. Open to Business Controller, Data Analyst, and BI roles in Denmark.

CORE COMPETENCIES

Reporting & BI: Power BI, DAX, Excel (advanced), dashboard ownership, single source of truth

Controlling & analysis: Forecasting, budgeting input, channel and customer profitability, KPI definition, variance review

Data infrastructure: SQL, PostgreSQL, Supabase, ETL pipelines, data modeling

Modelling: Python, pandas, scikit-learn, XGBoost, SHAP, forecasting, funnel analytics

AI & automation: Claude Code, n8n, FastAPI, GitHub Actions, LLM workflows for reporting and analysis

External signals: Web scraping for weather, market, and price data feeding planning and forecasts

Cross-functional: Stakeholder dialogue, requirements translation, presenting to leadership, documentation

PROFESSIONAL EXPERIENCE

Data Analyst & GTM Engineer

Feb 2026 – May 2026

Digi-Tal Regnskab • Denmark • Hybrid

Built the commercial analytics layer for a Danish accounting firm. Owned revenue analysis, forecasting and commission modelling, lead scoring, and the data infrastructure behind sales operations.

- **Commission and forecasting model.** Rebuilt the commission structure to weight MRR and LTV with forecasting inputs, removing the incentive to discount monthly subscriptions to close.
- **Full-channel revenue analysis.** Broke down close rate, conversion, meeting time, and pipeline velocity across paid, outbound, and inbound. Identified the channels driving customers and the ones burning budget.
- **Churn and segmentation analysis.** Segmented the customer and prospect base into active, lead, lost, and inactive cohorts. Surfaced the funnel drop-offs and patterns predicting closed deals.
- **Predictive models.** ICP and lead-scoring model with strong holdout performance, plus an ML classifier predicting prospect accounting software at ~75% accuracy across the Danish SMB market.
- **Stakeholder management.** Translated commercial needs into data requirements across sales and leadership, keeping reporting aligned to what the business actually used.

Stack: SQL • Python • Power BI • Pipedrive • Clay • Playwright • Apify • Claude Code

Data Analyst

May 2025 – Feb 2026

Veginova Seeds • Odense, Denmark • Hybrid

Promoted into BI ownership at an agricultural seed business. Owned the reporting and data infrastructure across sales, operations, and production, and the analysis leadership ran on.

- **Owned the single source of truth.** Power BI dashboards, SQL data models, and automated reporting pipelines across sales, operations, and production.
- **Improved KPI accuracy by 40%+.** Standardised metric definitions across teams and reconciled source data so dashboards matched the underlying systems.
- **Cut reporting time by 10+ hours per week.** Stabilised broken workflows, consolidated data sources, and built repeatable pipelines that replaced weekly manual rebuilds.
- **Built operational and forecasting reporting.** Pipeline, inventory, and production reporting on one source of truth, surfacing the metrics leadership needed for weekly decisions.

Marketing & RevOps

Aug 2023 – May 2025

Veginova Seeds • Odense, Denmark • Hybrid

Started in marketing and lead sourcing, moved into RevOps. Built the operational data layer connecting sales, marketing, and production, and the reporting that grew into the Data Analyst role.

- Connected ERP, CRM, and operational tools into reliable cross-functional data flows for sales and operations.

- Built reporting workflows that surfaced the operational metrics leadership needed for weekly decisions.
- Built automated data collection and enrichment pipelines, replacing spreadsheet-based manual work.

Stack: SQL · Power BI · Clay · n8n · Supabase · Apify · Excel · Claude Code

Founder

Jun 2024 – Aug 2025

Sira Logic · Remote · Self-employed

Service business building data collection, enrichment, and CRM automation for B2B companies. End-to-end delivery from discovery to deployed systems.

- Built enrichment and scoring workflows into a single pipeline, improving qualification accuracy by 30–40%.
- Built custom web scraping systems for industry-specific sources, and owned the full stack from scoping to handoff.

Stack: SQL · Python · Clay · n8n · Apify · HubSpot · GoHighLevel · Claude Code

Marketing & Digital Graduate

Jan 2023 – Aug 2023

Damstahl Danmark · Region Midtjylland, Denmark · Part-time

Part-time student role alongside BBA. Managed product and marketing data in ERP and CRM across European markets; built Excel dashboards for campaign reporting.

EDUCATION

Bachelor of Business Administration (BBA)

Aug 2020 – Jun 2023

Aarhus BSS, Aarhus University · Aarhus, Denmark
